

Final Project

Introduction

- a. Provide the theoretical rationale for your study. Include a brief literature review. Clearly specify your research questions/hypotheses.

Methods

- a. Briefly describe your research design, target population, sampling/recruitment methods, and procedure.
- b. Specify the measures you are using and provide information on reliability and validity if possible.
- c. Specify your analysis plan and outline how each hypothesis will be tested. Write out the equations for the models.
- d. If there are missing data in your dataset, indicate how they will be treated.

Results

- a. Clearly present and interpret your results. Use subheadings when necessary.
- b. Include tables and/or figures in APA format.

Discussion

- a. Provide a summary of your research findings (e.g., are your hypotheses supported)?
- b. Discuss the implications of your findings and limitations of the study.
