

Lab 2: Testing correlations

PSC 103B - Winter 2024

Read in Data

For today's class, we're going to use a fake dataset that I created looking at the relation between temperature (in Fahrenheit), ice cream sales, and pool accidents .

Running Cod

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).
